

Letter of Recommendation

It gives me immense pleasure to recommend my associate **Mr. Aditya Senthil Kumar** to the MS Business Analytics program at your university. In my capacity as Lead Consultant of Sailotech Pvt Ltd, I have worked closely with Mr. Aditya for around 2 years.

As Data Analyst, Mr. Aditya has managed to perform well in all the assignments coordinating with the team members for example Mr. Aditya helped accumulate, organize data and automate an process module called **INFOR-LN Process Automation** where he used tools like SQL, Excel to collect the required data and organize it in a specific manner and UiPath to automate the module which obtained data from a database and were subsequently applied in INFOR-LN Tool to fill in the data and execute the processes one by one. His fidelity and dedication to the task at hand enabled him to finish the work prior to the deadlines.

Mr. Aditya has been one of the few zestful and exuberant persons in my team. He sustains an innate leadership quality and eagerly takes ownership of work be it official or extracurricular. Out of his interests, he has been providing us excellent support in our business development activities and has identified business opportunities.

He is very articulate and has been participating actively in various organizational activities. Given the skills he possesses, I strongly feel that the Business Analytics program from your institution would be of immense value to him and firmly believe he would be an asset to your school. If you need any further information or clarifications, please feel free to contact me.
