- ***Languages Spoken:*** English (Fluent), Tamil (Fluent), Telugu (Intermediate), French (Beginner).

RELEVANT PROJECTS

Sailotech Vendor Management Process (SVMP)
This Project is developed to extract, clean and manipulate the data by processing scanned PDF documents and giving access rights by creating users. This Designed flow also can run from UiPath Orchestrator.

Infor LN- Process Automation and Patch Update
Created Test scripts of Production, sales & purchase end to end cycles as per the standard functionality and designed to check newly updated patches by Infor-LN on live site. UiPath bot was trained to search for latest patch updates and sending newly updated patches names to manager and after checking reply from manager successfully installing patches.

HR On-boarding Process
HR team will short-list the candidates based on the interview and they prepare the list in excel, upload the list to shared folder then through UiPath bot we pick the new list from the folder, then read the list and trigger initial offer email to get confirmation and initial documents.

ACHIEVEMENT AND CERTIFICATIONS

Coursera: Google Data Analytics Professional Certificate.
Coursera: Python and Statistics in Fin Management.
UiPath: RPA Advanced Developer.
Automation Anywhere: Advanced RPA Professional.
